Additional Information:		
Submit this application form along with the site evaluation fee, a plat of the property, a copy of the floor plan, and a sketch or building site plan which shows: lot dimensions; building location and dimensions; distances from property lines to building; location of drives, swimming pools and outbuildings; location of ponds, streams, swamps or other drainage ways; and location of wells on the property and within 100 ft. of property lines. Lot corners and building location must be staked prior to the site evaluation. When all of the above have been submitted/completed, contact Environmental Health for a site evaluation appointment.		
I hereby authorize the County Board of Health to conduct a site evaluation on this property for the purpose of determining its suitability for development with an on-site sewage management system to serve the facility described on this application.
